

Chutex 40 Skirting Rubber

Reglin Chutex 40 Skirting Rubber is a highly flexible wear and tear resistant 40 Duro rubber designed for use as a conveyor sealing skirt.

FEATURES

Chutex 40 Skirting Rubber is made from a highly elastic premium grade natural rubber compound and will display excellent resistance to abrasion.

Chutex 40 Skirting Rubber has excellent physical properties including mechanical strength and cut and tear resistance.

Chutex 40 Skirting is extremely flexible and is designed to bend against the conveyor belt to create a seal once adjusted. This flexible seal reduces both material spillage and dust escaping even on systems with inconsistent belt levels. This design pro-longs the life of the skirt and also minimizes the potential of wear and damage to the conveyor belt itself.

Chutex 40 Skirting Rubber can be supplied in full rolls or pre-cut skirting rubber strips to suit standard conveyor system designs, ready for easy installation.
