

Conveyor Slider Bars

Reglin Conveyor Slider bars are a premium grade UHMWPE bar with profiled T-Slot.

FEATURES

Reglin Conveyor Slider Bars are made from a high-grade low friction UHMWPE (Ultra High Molecular Weight Polyethylene).

Conveyor Slider Bars offer good wear life and reduced surface friction, ensuring conveyor belts can slide easily along them even under loading.

Reglin Conveyor Slider Bars feature T-Slots which allow for easy mechanical fastening to roller frames with an adaptor plate using T-Bolts. Adaptor plates are also available to suit standard belt width trough rollers.

TECHNICAL INFORMATION

Polymer	UHMWPE	
Colour	White	
Specific Gravity	0.935	ASTM D297
Hardness	66 Shore D	ASTM D2240
