

Polyurethane Skirting

Reglin Polyurethane Skirting is a wear and tear resistant 70 Duro polyurethane designed for use as a conveyor sealing skirt.

FEATURES

Polyurethane Skirting is made from a premium grade polyurethane compound and will display excellent resistance to cutting, impact and abrasion.

Polyurethane Skirting has excellent physical properties including mechanical strength and tear resistance. It is supplied with a beveled edge and is designed to be installed and adjusted to just above the conveyor belt to create a seal.

Polyurethane Skirting is rigid enough to create a solid impact resistant sealing skirt which reduces material spillage but also minimizes the potential of damage to the conveyor belt itself. Caution must be taken when installing Polyurethane skirting as incorrect adjustment can cause wear and damage to the conveyor belt.

Polyurethane Skirting is supplied in pre-cut skirting rubber strips to suit standard conveyor system designs, ready for easy installation.

TECHNICAL INFORMATION

Polymer	PU	
Colour	Red	
Specific Gravity	1.25	ASTM D297
Hardness	70° ± 5° Shore A	ASTM D2240
Tensile Strength	35 MPa (min)	ASTM D412
Elongation @ Break	650% (min)	ASTM D412
Abrasion	65mm ³ (max) @10N	ASTM D5963
Temperature Range	-20°C to +70°C	
Tear Strength	20 N/mm (min)	ASTM D624

AVAILABLE SIZES

Reglin Stock Polyurethane Skirting in a range of standard thicknesses and strip sizes. Polyurethane skirting can also be custom made in Australia. It can be moulded into any thickness and profile required and supplied with a maximum length of 5mtrs. Minimum order quantities and lead times apply to this product.
