

# THA-3000 Viton Adhesive

THA 3000 Viton Adhesive system is a two-part fluoroelastomer based rubber bonding cement.

## FEATURES

Reglin THA 3000 Viton adhesive system is a premium bonding cement made up of THA 3000 Adhesive and its specifically designed accelerator.

THA 3000 Viton adhesive system will achieve excellent adhesion when bonding Viton rubber to Viton rubber, Viton rubber to steel and Viton to fabric.

THA 3000 displays excellent long-term adhesion levels in service. It will display very high temperature and exceptional resistance to a broad range of chemicals and aggressive acids.

THA 3000 exhibits excellent resistance to oil and petroleum-based products including a diverse range of fuels, greases, solvents and hydraulic fluids. It is also resistant to mineral acids, aliphatic and aromatic hydrocarbons.

## TECHNICAL INFORMATION

Polymer base	FKM
Colour	Dark Grey
Temperature Range	-28°C to 232°C

## AVAILABLE SIZES

PART NO.	DESCRIPTION	WEIGHT (EACH)
GLFTHA3000475	THA-3000 2 Component Viton Adhesive 475ml can (C/W Accelerator)	0.6 kgs
