SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

| Product name | : | IRODUR® E 462 | | | | |
|------------------------------------|---|---|--|--|--|--|
| Manufacturer or supplier's details | | | | | | |
| Company Address | : | Huntsman Polyurethanes (Australia) Pty Ltd ACN: 090 446 165 Gate 3, 765 Ballarat Road Deer Park, Victoria 3023 Australia | | | | |
| Telephone | : | + 613 9361 6000 | | | | |
| E-mail address | : | Global_Product_EHS_HPU@huntsman.com | | | | |
| Emergency telephone number | : | Australia: 1800 786 152 (ALL HOURS) International: +65 6336 6011 (ALL HOURS) | | | | |

Recommended use of the chemical and restrictions on use

| Recommended use | : | Component of a Polyurethane System. |
|---------------------|---|-------------------------------------|
| Restrictions on use | : | For industrial use only. |

SECTION 2. HAZARDS IDENTIFICATION

| GHS Classification Flammable liquids | : | Category 2 |
|--|---|---|
| Acute toxicity (Inhalation) | : | Category 4 |
| Skin corrosion/irritation | : | Category 2 |
| Serious eye damage/eye irritation | : | Category 2A |
| Respiratory sensitisation | : | Category 1 |
| Skin sensitisation | : | Category 1 |
| Carcinogenicity | : | Category 2 |
| Specific target organ toxicity - single exposure | : | Category 3 (Respiratory system, Central nervous system) |

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture : Mixture

Hazardous components

| Chemical name | CAS-No. | Concentration (% w/w) |
|--|-----------|-----------------------|
| ethyl acetate | 141-78-6 | >= 60 - <= 100 |
| Isocyanic acid, polymethylenepolyphenylene ester | 9016-87-9 | >= 10 - < 30 |
| 4,4'-methylenediphenyl diisocyanate | 101-68-8 | < 10 |
| Diphenylmethane-2,4'- diisocyanate | 5873-54-1 | < 10 |

SECTION 4. FIRST AID MEASURES

| General advice : | Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance. |
|---------------------------|--|
| If inhaled : | Move to fresh air. Consult a physician after significant exposure. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice. |
| In case of skin contact : | Wash off with soap and plenty of water. Take off contaminated clothing and shoes immediately. Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Cool skin rapidly with cold water after contact with molten polymer. If symptoms persist, call a physician. Wash contaminated clothing before reuse. An MDI study has demonstrated that a polyglycol-based skin cleanser (such as D-TamTM, PEG-400) or corn oil may be more effective than soap and water. |
| In case of eye contact | Immediately flush eye(s) with plenty of water. |

| Most and e delay | important symptoms ffects, both acute and ed | : None known. | |
| Notes | to physician | : Keep under med | ical supervision for at least 48 hours. |

SECTION 5. FIREFIGHTING MEASURES

| Suitable extinguishing media | : | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Foam Dry powder Carbon dioxide (CO2) |
|---|---|---|
| Unsuitable extinguishing media | : | No data is available on the product itself. |
| Specific hazards during firefighting | : | The pressure in sealed containers can increase under the influence of heat. |
| Hazardous combustion products | : | No data is available on the product itself. |
| Specific extinguishing methods | : | Do not allow run-off from fire fighting to enter drains or water courses. Standard procedure for chemical fires. Use a water spray to cool fully closed containers. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Due to reaction with water producing CO2-gas, a hazardous build-up of pressure could result if contaminated containers are re-sealed. Use water spray to cool unopened containers. For safety reasons in case of fire, cans should be stored separately in closed containments. |
| Special protective equipment for firefighters | : | Wear an approved positive pressure self-contained breathing apparatus in addition to standard fire fighting gear. |

HUNTSMAN

IRODUR® E 462

| Version | Revision Date: | SDS Number: | Date of last issue: - |
|---------|----------------|--------------|---------------------------------|

| 1.0 | 07.10.2010 | 400001000120 | Date of first 1350c. 07.10.2010 |

In the event of fire, wear self-contained breathing apparatus.

SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protective equipment and emergency procedures | : | Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. |
|---|---|--|
| Environmental precautions | : | Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. |
| Methods and materials for containment and cleaning up | : | Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). |

SECTION 7. HANDLING AND STORAGE

| Advice on protection against : fire and explosion | Avoid formation of aerosol. Keep away from sources of ignition - No smoking. Take measures to prevent the build up of electrostatic charge. |
|--|---|
| Advice on safe handling : | Avoid exceeding the given occupational exposure limits (see section 8). Avoid contact with skin and eyes. For personal protection see section 8. Persons with a history of skin sensitisation problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Container may be opened only under exhaust ventilation hood. |
| Hygiene measures : | Handle in accordance with good industrial hygiene and safety practice. When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday. |
| Conditions for safe storage : | No smoking. Store in cool place. Keep in a well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Electrical installations / working materials must comply with the technological safety standards. |

Components:

Isocyanic acid, polymethylenepolyphenylene ester: Species: Rat, male and female NOEC: 0.2 mg/m3 Test atmosphere: dust/mist Exposure time: 2 yr Number of exposures: 5 d Method: OECD Test Guideline 453

4,4'-methylenediphenyl diisocyanate: Species: Rat, male and female NOEC: 0.2 mg/m3 Exposure time: 2 yr Number of exposures: 5 d Method: OECD Test Guideline 453

Diphenylmethane-2,4'- diisocyanate: Species: Rat, male and female NOEC: 0.2 mg/m3 Exposure time: 2 yr Number of exposures: 5 d Method: OECD Test Guideline 453

Components:

Diphenylmethane-2,4'- diisocyanate: Repeated dose toxicity - : Mild eye irritation Assessment

Aspiration toxicity
