

Bostik 9300 Rubber Primer

Bostik 9300 is a two-part solvent based rubber primer.

FEATURES

Bostik 9300 priming system is made from a mixture of a liquid Part A and powder based Part B.

Once mixed together it is designed for use as an easy to apply single coat rubber primer which chemically etches the surface of the rubber to improve bond strength with Cold bonding adhesives.

Bostik 9300 can be applied by wiping onto the rubber surface.
